ABOUT ME

 I am a passionate Frontend Developer & UI/UX Designer with expertise in JavaScript, React, HTML, and CSS. I have a strong foundation in modern web development and a keen eye for design, utilizing Figma to create engaging and user-friendly interfaces.
I have experience redesigning websites, developing responsive and interactive web applications, and building full-stack projects using React, Node.js, Express, and MongoDB. My recent work includes adding search functionality, authentication, and user profile management to a web application.

PROJECTS

Shutter Sphere (In Progress)

- A platform to search, book, and chat with photographers based on location and specialization, with portfolio and past work visibility.
- Currently designing and developing a full-stack web application using React, Node.js, Express, and MongoDB.
- Photographer Search, Photographer Profile, Booking System, Chat Board, User Authentication, Profile Management, Search Functionality, Responsive UI

Website Clones (YouTube, Spotify, Netflix)

- Developed YouTube, Spotify, and Netflix clones using React, focusing on UI/UX replication and component-based architecture.
- Ensured responsiveness and smooth navigation for an engaging user experience.

YouTube Clone Using React

- Developed a YouTube Clone using React and the YouTube Data API, allowing users to search and watch videos dynamically.
- **Features**: Video search, video playback, YouTube Data API integration, responsive UI, React Hooks (useState, useEffect), and Axios for API requests.

SKILLS

- React
- Node.js
- JavaScript
- Git & GitHub

- HTML
- CSS
- TailwindCSS
- C++

- Express.js
- REST API Development
- MongoDB
- UI/UX Design (Figma)
